What is Uptime Kuma?
Uptime Kuma is a fancy self-hosted monitoring tool. - https://github.com/louislam/uptime-kuma

Install Uptime Kuma
Log into the Linux device
Run the following commands in a terminal window
# update software repositories
sudo apt update
# install available software updates
sudo apt upgrade -y
# install prerequisites
sudo apt install git curl -y
# add nodejs software repository
curl -sL https://deb.nodesource.com/setup_current.x | sudo bash -
# install nodejs
sudo apt install nodejs -y
# clone from git
git clone https://github.com/louislam/uptime-kuma.git ./uptime-kuma
change directory to ./uptime-kuma
cd uptime-kuma
run setup
npm run setup
run uptime kuma
node server/server.js
Open a web browser and navigate to http://DNSorIP:3001
Select a language and create an administrator username and password
> Click Create
Welcome to Uptime Kuma
Run Uptime Kuma as a Service (Optional, but recommended)
Press CTRL + C to kill the running Uptime Kuma process
Continue with the following steps to run Uptime Kuma as a service
# create nodejs user
sudo useradd nodejs
# change directory out of uptime-kuma
cd ..
# move uptime kuma to /opt
sudo mv ~/uptime-kuma /opt
# create service bash file
sudo nano /opt/uptime-kuma/uptime-kuma.sh
Paste the following configuration into uptime-kuma.sh
#!/usr/bin/bash
/usr/bin/node /opt/uptime-kuma/server/server.js

Press CTRL+O, Enter, CTRL+X to write the changes
Continue with the following commands
# make uptime-kuma.sh executable
sudo chmod +x /opt/uptime-kuma/uptime-kuma.sh
# create uptime-kuma service file
sudo nano /etc/systemd/system/uptime-kuma.service
Paste the following configuration into uptime-kuma.service
[Unit]
Description=Uptime Kuma

[Service]
ExecStart=/opt/uptime-kuma/uptime-kuma.sh
Restart=always
User=nodejs
Group=nodejs
WorkingDirectory=/opt/uptime-kuma

[Install]
WantedBy=multi-user.target

Press CTRL+O, Enter, CTRL+X to write the changes
Continue with the following commands
# set owner of /opt/uptime-kuma
sudo chown nodejs:nodejs /opt/uptime-kuma -R
# reload systemd services
sudo systemctl daemon-reload
# start uptime-kuma service on boot and now
sudo systemctl enable uptime-kuma --now

how to install uptime kuma in ubuntu 22

Boss, এখানে **Uptime Kuma** Ubuntu 22.04 এ ইনস্টল করার সবচেয়ে সিম্পল এবং স্টেবল পদ্ধতি দিলাম — দু'ভাবে করতে পারেন:

✅ Method 1: Docker দিয়ে (Recommended – সবচেয়ে সহজ)

Ubuntu 22.04 এ Docker থাকলে এটা বেস্ট অপশন।

🔹 Step 1: Docker Install (না থাকলে)

```bash
sudo apt update
sudo apt install docker.io -y
sudo systemctl enable docker
sudo systemctl start docker
```

🔹 Step 2: Uptime Kuma Run করুন

```bash
sudo docker run -d \
  --restart=always \
  -p 3001:3001 \
  -v uptime-kuma:/app/data \
  --name uptime-kuma \
  louislam/uptime-kuma
```

🔹 Browser এ যান

```code
http://SERVER-IP:3001
```

Language select করুন → Admin username/password দিন → Done ✅

✅ Method 2: Node.js দিয়ে Manual Install

Docker না চাইলে এই পদ্ধতি ব্যবহার করুন।

🔹 Step 1: System Update

```bash
sudo apt update && sudo apt upgrade -y
```

🔹 Step 2: Required Packages Install

```bash
sudo apt install git curl -y
```

🔹 Step 3: Node.js Install (Recommended LTS)

```bash
curl -fsSL https://deb.nodesource.com/setup_lts.x | sudo -E bash -
sudo apt install nodejs -y
```

Check করুন:

```bash
node -v
npm -v
```

🔹 Step 4: Uptime Kuma Clone করুন

```bash
git clone https://github.com/louislam/uptime-kuma.git
cd uptime-kuma
```

🔹 Step 5: Setup এবং Run

```bash
npm install
node server/server.js
```

Browser এ যান:

```
http://SERVER-IP:3001
```

✅ Systemd Service হিসেবে চালাতে চাইলে (Recommended for Production)

- Stop করুন (CTRL+C)
- Service User তৈরি করুন

```bash
sudo useradd -r -m -U nodejs
```

- Move করুন

```bash
sudo mv uptime-kuma /opt/
sudo chown -R nodejs:nodejs /opt/uptime-kuma
```

- Service File তৈরি করুন

```bash
sudo nano /etc/systemd/system/uptime-kuma.service
```

Paste করুন:

```
[Unit]
Description=Uptime Kuma Monitoring Service
After=network.target

[Service]
Type=simple
User=nodejs
Group=nodejs
WorkingDirectory=/opt/uptime-kuma
ExecStart=/usr/bin/node server/server.js
Restart=always

[Install]
WantedBy=multi-user.target
```

Save করে বের হন।

- Enable & Start করুন

```bash
sudo systemctl daemon-reload
sudo systemctl enable uptime-kuma
sudo systemctl start uptime-kuma
```

- Status Check

```bash
sudo systemctl status uptime-kuma
```

🎯 Access URL

```
http://SERVER-IP:3001
```

Boss, আপনার Ubuntu 22 সার্ভার কি production environment?
আপনি চাইলে আমি আপনাকে Nginx reverse proxy + SSL (Let's Encrypt) সেটআপ করেও দিতে পারি।
